Motywowanie jako determinanta

efektywności pracy kadry

menedżerskiej Jadwiga Kaczmarzyk

2015-12-02 Podniesienie poziomu wydajności pracy wiąże się z: inwestowaniem w rozwój zaawansowanych technologii, odpowiednią organizacją pracy, potrzebą podniesienia kultury ekonomicznej społeczeństwa i zmiany relacji na linii pracodawca – pracobiorca. Wciąż jeszcze w wielu firmach bardzo zaniedbana dziedzina jest zarządzanie zasobami ludzkimi, szczególnie w sferze motywowania personelu. W Polsce na początku transformacji polityczno-gospodarczych właściciele i menedżerowie szybko uświadomili sobie znaczenie finansów i marketingu, dopiero jednak teraz więcej uwagi poświęca się zarządzaniu ludźmi. Tymczasem dzisiaj przewagę nad konkurencją osiąga się właśnie w ten sposób. Najlepsze rezultaty przynosi zarówno elastyczne zatrudnienie, jak i dobre motywowanie. Wybór tematu niniejszej pracy uzasadniony jest właśnie tym, że motywowanie jako funkcja zarządzania zasobami ludzkimi jest często pomijana lub nie przykłada się do niej należytej uwagi. Celem głównym pracy jest próba zdefiniowania i ustalenia hierarchii ważności tych czynników, które najbardziej motywują kadre

menedżerską do pracy, działania, innowacji - efektywności. Osiągnięcie zamierzonego celu możliwe było dzięki wykorzystaniu metoda badawczych, wśród których znalazła się metoda obserwacji i ankietowa. Posługując się narzędziem badawczym, którym była skonstruowana ankieta, zapytano menedżerów wybranej firmy jakie czynniki i dlaczego motywują ich do działania. Strukturę pracy stanowią cztery rozdziały o następującej treści. Rozdział pierwszy o charakterze teoretycznym przedstawia pojęcie motywacji, klasyfikuje wybrane jej teorie i opisuje model procesu motywacyjnego. W rozdziale drugim, również o charakterze teoretycznym wymieniono rodzaje systemów motywacyjnych, dokładnie opisano wynagrodzenie jako czynnik systemu motywacyjnego. Omówiono także motywacyjną rolę partycypacji w zarządzaniu. Natomiast rozdział trzeci prezentuje system motywowania jaki został wprowadzony w wybranym przedsiębiorstwie. Poza przedstawieniem firmy szerzej opisano w nim motywacje w polskich realiach i korzyści wynikające z czynności motywowania. Z kolei w rozdziale czwartym o charakterze empirycznym posługując się ankietą przeprowadzono badania na wybranej grupie respondentów jaką byli menedżerowie (bez względu na płeć). Dokonano klasyfikacji i zaproponowano na podstawie analizy materiału empirycznego hierarchię czynników motywacyjnych. Poza badaniami własnym podczas pisania niniejszej pracy korzystano z bogatej literatury przedmiotu, publikacji prasowych, czasopism specjalistycznych (np. "Personel") oraz Internetu.

Reinventing Poland Martin Myant 2008-03-03 The end of communism and accession to the European Union have had a huge impact on Poland. This book provides an overall assessment of the post-1989 transformation in Poland. It focuses in particular on four key themes: economic transformation and its outcomes; the heritage of the past and national identity; regional development in Poland including the implications of EU accession for regional development; and political developments both before and after EU accession. In addition the book shows how changes in all these areas are related, and emphasises the overall common themes. The book is in memory of George Blazyca, of the University of Paisley, whose work on the political economy of transition in Poland is highly regarded, and who did a great deal to support the work of Polish academic colleagues and to promote the work of young scholars.

The Women's Liberation Movement in Russia Richard Stites 2021-07-13 Richard Stites views the struggle for liberation of Russian women in the context of both nineteenth-century

European feminism and twentieth-century communism. The central personalities, their vigorous exchange of ideas, the social and political events that marked the emerging ideal of emancipation--all come to life in this absorbing and dramatic account. The author's history begins with the feminist, nihilist, and populist impulses of the 1860s and 1870s, and leads to the social mobilization campaigns of the early Soviet period.

Crossing Boundaries, Building Bridges

Annie Canel 2005-08-08 Women engineers have been in the public limelight for decades, yet we have surprisingly little historically grounded understanding of the patterns of employment and education of women in this field. Most studies are either policy papers or limited to statistical analyses. Moreover, the scant historical research so far available emphasizes the individual, single and unique character of those women working in engineering, often using anecdotal evidence but ignoring larger issues like the patterns of the labour market and educational institutions. *Crossing Boundaries, Building Bridges* offers answers to the question why women engineers have required special permits to pass through the male guarded gates of engineering and examines how they have managed this. It explores the differences and similarities between women engineers in nine countries from a gender point of view. Through case studies the book considers the mechanisms of exclusion and inclusion of women engineers.

Women's Struggle for Higher Education in Russia, 1855-1900 Christine

Johanson 1987-01-01 Unlike contemporary Soviet and Western accounts which emphasize the involvement of educated women in the revolutionary movement, Christine Johanson investigates the relationship between developments in women's education and domestic politics of the post-Crimean War era. The author shows how the particular nature of autocratic rule under Alexander II facilitated the establishment of university-level courses for women, and demonstrates that Russian women who cooperated with the government in order to increase their educational opportunities far outnumbered the female revolutionists who sought to overthrow it. And, while acknowledging that Russian radicalism gave enormous encouragement to women's pursuit of university study, this book shows that it was the support of progressive statesmen and academics which allowed the creation of higher educational facilities for women. The attitudes, aspirations, and frustrations of women who enrolled in these educational facilities are also examined. Considerable attention is given to the training and practice of female

physicians and to the testing of their skills and commitment to social service in tradition-bound peasant villages and the field hospitals of the Russo-Turkish war. The concluding chapter explored the conservative reaction following the assassination of Alexander II and the subsequent closure of women's advanced educational facilities.

Mothers and Daughters Barbara Alpern Engel 2000-02 The first psychosocial study of the female intelligentsia in Russia, *Mothers and Daughters* explains how and why women radicals of the nineteenth century diverged from their male counterparts, describes the forces that led women to rebel, and discusses their mixed

legacy to future generations. Barbara Alpern Engel examines her subject on three levels: the traditional family system; early feminism and women's rebellion against the family; and the causes and consequences of women's revolutionary activity. She describes the impact this revolt had on the family and the lives of radical women and the movement's role in inspiring a new feminine mythology. Throughout, Engel brings nineteenth-century women to life, humanizing history as she presents a case study of how the personal became political in a time and place very different from our own.

Women and Higher Education in Russia, 1855-1905 Ruth Arlene Fluck Dudgeon 1975

Citizen Countess Adele Lindenmeyr 2019-11-12 Countess Sofia Panina lived a remarkable life. Born into an aristocratic family in imperial Russia, she found her true calling in improving the lives of urban workers. Her passion for social service and reputation as the "Red Countess" led her to political prominence after the fall of the Romanovs. She became the first woman to hold a cabinet position and the first political prisoner tried by the Bolsheviks. The upheavals of the 1917 Revolution forced her to flee her beloved country, but instead of living a quiet life in exile she devoted the rest of her long life to humanitarian efforts on behalf of fellow refugees. Based on Adele Lindenmeyr's detailed research in dozens of archival collections, *Citizen Countess* establishes Sofia Panina as an astute eyewitness to and passionate participant in the historical events that shaped her life. Her experiences shed light on the evolution of the European nobility, women's emancipation and political influence of the time, and the fate of Russian liberalism.

Russian Teachers and Peasant Revolution Scott Joseph Seregny 1989

Rosenberg "This book is a timely and worthy addition to the... body of work on the 'democratic intelligentsia' of 'third element' in prerevolutionary Russia." –The Russian Review "... compelling and moving." –History Today "... this substantial volume provides detailed evidence of the complexities and ambiguities inherent in the day-to-day zamstvo-teacher-peasant relationship in the period preceding the 1905 Revolution." –The Slavonic Review "... carefully researched and well documented..." –The Journal of Peasant Studies

Women, Education, and Agency, 1600–2000 Jean Spence 2009-09-10 This collection of essays brings together

an international roster of contributors to provide historical insight into women's agency and activism in education throughout from the seventeenth to the twentieth century. Topics discussed range from the strategies adopted by individual women to achieve a personal education and the influence of educated women upon their social environment, to the organized efforts of groups of women to pursue broader feminist goals in an educational context. The collection is designed to recover the variety of the voices of women inhabiting different geographical and social contexts while highlighting commonality and continuity with reference to creativity, achievement, and the management and transgression of structures of gender inequality.
